

## About Predii

Predii is an Enterprise AI Software Company based in Palo Alto, CA and Pune, India. Our specialized, validated AI platform has been purpose-built to extract predictive and prescriptive insights from unstructured textual, sensor, and procedural data in the automotive aftermarket and service business. Predii's patented AI engine is currently processing 2+ billion historical repair jobs monthly. Our 8+ years NLP and domain expertise enable industry leading companies such as Snap-on, Epicor, Mercedes-Benz, PepsiCo, and Valvoline to leverage previously unused data to power predictive solutions, increase aftersales revenue, drive product innovation, and support data-driven decision-making strategies.

Predii has been recognized by Gartner, ABI Research, and the Industrial IoT Solutions World Congress for our focus in Applied AI in repair and maintenance.

## About this Role: DevOps Engineer

As a DevOps Engineer, your daily duties will include building, maintaining and supporting development/QA/production environments, web application infrastructures, and Data warehouse & Data pipeline infrastructures. You'll be working closely with a team of full stack and data engineers deploy, process, maintain and support Predii's products and pipelines. You will participate in on-call rotations and schedules, as well as assist in ensuring regulatory compliance at the network level. At Predii, we use Azure for cloud hosting. We use Kubernetes and Dockers heavily.

As a member of the engineering team at Predii, you will be working with cross-functional teams, customers and open-source communities. You will have the opportunity to take part in building new industry-changing services in our portfolio and participate in state-of-the-art research in AI and ML
