

About Predii

Predii is an Enterprise AI Software Company based in Palo Alto, CA and Pune, India. Our specialized, validated AI platform has been purpose-built to extract predictive and prescriptive insights from unstructured textual, sensor, and procedural data in the automotive aftermarket and service business. Predii's patented AI engine is currently processing 2+ billion historical repair jobs monthly. Our 8+ years NLP and domain expertise enable industry leading companies such as Snap-on, Epicor, Mercedes-Benz, PepsiCo, and Valvoline to leverage previously unused data to power predictive solutions, increase aftersales revenue, drive product innovation, and support data-driven decision-making strategies.

Predii has been recognized by Gartner, ABI Research, and the Industrial IoT Solutions World Congress for our focus in Applied AI in repair and maintenance.

About this Role: SQA Engineer

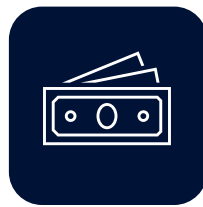

As a SQA Engineer, you will be responsible to understand and document requirements to design well-structured test plans, test cases. This will involve consistently executing test cases (manual and/or automated) and report the results in a timely manner, generating statistics and logs to document testing phase, including success or failure status. You will review and analyze desired output for client projects, based on various data points, investigate and document defects, and organize & manage multiple regression tests associated with various branches of source code. You will actively collaborate with internal teams to plan and execute test activities and prepare release-builds. As a member of the engineering team at Predii, you will be working with cross-functional teams, customers and open source communities. You will have the opportunity to take part in building new industry-changing services in our portfolio.

Bachelor's Degree/
